Skedco is an authorized distributor for PMI, SMC, Rock-N-Rescue, and other distributors of climbing, safety, rescue, and survival gear. We can offer products manufactured by Pigeon Mountain Industries, SMC, Gibbs, Petzl, Junkin, ROCO and others. Contact Skedco for catalogs or pricing on products such as:

- Ascenders
- Carabiners
- Descenders
- NFPA Rescue Rope
- Dynamic Rope
- Water Rescue Rope
- Prusik Cord
- Rope Protection Products
- Rope Bags
- Winches
- Hoisting Systems
- Harnesses
- Screw Links
- Pulleys
- Helmets
- Gloves
- Headlamps
- Basket Litters
- Cable Ladders
- Publications
- Slings & Webbing

Skedco accepts VISA and MasterCard as well as purchase orders from federal, state, and local government agencies. Many of the products offered by Skedco are available to federal purchasers under the provisions of a variety of federal contracts and purchasing schedules; federal purchasers are therefore encouraged to request appropriate pricing. Price quotations are available upon request.
Dear Skedco customer,

Welcome to Skedco product catalog. In addition to traditional items such as the Sked® Stretcher and Oregon Spine Splint II™, which have made the Skedco name known throughout the world. This catalog will present a variety of new and exciting products which bear the Skedco name and will help solve many of the rescue and safety issues dictated by federal, state, and local regulations.

We encourage you to take the time to thumb through this catalog and consider how these products can help you do your job better. If you are looking for safety or rescue related products that you do not see in this catalog, give Skedco a call. We are authorized dealers for PMI, Rock-n-Rescue, ROCO, Capital Safety, Ambu and other suppliers. Let us help you fulfill all of your rescue needs.

Those who have purchased from Skedco in the past know that we stand by everything we sell. Whether you need quotes, technical advice, equipment or training, our staff is waiting to serve your needs. Skedco products save lives; don't settle for less.

About the cover...
Roco Stand-by Crew member Denver Payne practices with the Sked Stretcher at the Roco Training Center in Baton Rouge, LA.

WARNING!
It is the responsibility of the user of climbing, rappelling, rescue and safety equipment to obtain competent training and instruction and take adequate precautions for safety when using this equipment. The information in this catalog is provided for making purchasing decisions only; it is not a substitute for competent instruction and training in techniques and safety.
The Sked® Rescue System

SKED® Basic Rescue System

The original and still the best solution for confined space, high angle or technical rescue, and traditional land based applications, the Sked® stretcher is a revolutionary design which provides outstanding patient protection and security. The Sked® comes equipped for hoisting by helicopter in horizontal position or hoisting in vertical position in caves or industrial confined spaces. When the patient is packaged, the stretcher becomes rigid. The durable plastic provides protection for the patient while allowing extrication through the most demanding confined spaces. The stretcher is rolled for storage in a tough cordura backpack which is included with the system. The system ships at 19 lbs. and comes complete for most applications. Available in International Orange or OD Green. Made in U.S.A.

| SK-200-OR | Sked® Basic Rescue System, International Orange |
| SK-200-GR | Sked® Basic Rescue System, OD Green |
| SK-200C-OR | Sked® Basic Rescue System (upgraded with Cobra Buckles) Int'l Orange |
| SK-200C-GR | Sked® Basic Rescue System (upgraded with Cobra Buckles) OD Green |

Each Sked® Basic Rescue System comes complete with:

- **SK-201 The Sked® Stretcher** - the stretcher is fabricated from a special plastic formula which is both flexible and durable. Securing straps with steel buckles are sewn onto the stretcher through brass grommets which contribute to the strength and durability. Sked is functional in the desert or jungle. It will not break even at -120°F.

- **SK-202 Cordura backpack/Towing Harness** - this durable backpack includes shoulder straps and pockets for storing the Sked® accessories when not in use.

- **SK-203 Horizontal Lift Slings** - a pair of 9,000 lb. tensile strength slings is provided for hoisting the Sked® stretcher by helicopter or other haul system in a horizontal position.

- **SK-204 Tow Strap** - this 6 foot strap with bronze snap hooks on each end attaches the Sked® stretcher to the backpack, changing the backpack to a useful towing harness. It can be used by one or more people, in several configurations for towing the Sked®. It is not to be used for hoisting patients.

- **SK-205 Removable Webbing Handles** - in addition to the four handles sewn permanently onto the Sked® stretcher, four additional removable handles are provided to allow the Sked to be carried by up to 8 rescuers.

- **SK-206 Steel Locking 'D' Carabiner** - a large locking ‘D’ steel carabiner is included with the system for attaching the stretcher to a hoisting system. These carabiners are rated at a 9,000 lb. minimum break strength.

- **SK-207 Vertical Lift Sling** - for lifting in the vertical position, 30 ft. of 3/8” PMI kernmantle rescue rope, with a minimum break strength of 5,265 lbs., is provided with a figure 8 knot in the middle.

SKED-EVAC™ Aluminum Side Release Buckle Conversion Kit

This Austrian made Skedco/Cobra side release buckles that are dependable and strong enough to meet the needs of securing a patient into a Sked® stretcher without the danger of breakage. These buckles are rated at 3 thousand pounds. They are durable and easy to use. When they are under tension they are very hard to release thus accidental release under tension is not an issue. With these buckles you will no longer have to weave the webbing through the buckles when packaging a patient. Patient packaging is often done in about half of the time as when using the original steel buckles. Because of the cost of the buckles they are offered as a special order on new Sked®s and as a retrofit kit for Sked®s you already have. You do, however, get everything you pay for with these buckles. They dramatically speed up the patient packaging because of the ease of using them.

WE CAN PROVIDE YOU WITH TECHNICAL INFORMATION, ALTERNATIVE PRODUCT SUGGESTION, RECOMMEND LITERATURE, OR REFER YOU TO A QUALIFIED PROFESSIONAL FOR TRAINING AND SITE EVALUATION.

The Complete Rescue System combines the Sked® Basic Rescue System (SK-200), the Oregon™ Spine Splint II (SK-300) and the Sked® Foam Flotation System (SK-600) in a single money saving package. The entire system combines to make a single back-packable unit. With this system you’ll be ready for any emergency rescue situation - on land, in the water, or in the air. Available in International Orange or OD Green. Also available in a military option with the SK-600A Inflatable Flotation System. Made in USA.

6530-01-301-0796
This spinal immobilization/extrication device is the only device of its type available that meets all of the established criteria for immobilizing a seated patient. Unlike other vest type immobilizers, the OSS II™ does not move up, down or rotate on the patient’s torso when properly applied. The head straps are far superior to all other brands. An ideal companion for the Sked® Stretcher System, when properly used the OSS II™ provides for safe removal of patients from injury sights without doing further damage to the spine. The unique criss-crossing shoulder strap design provides superior immobilization without restricting breathing and, for clavical fractures, can be re-configured to retract and immobilize the shoulders. The OSS II™ is designed to provide easy access to the patient’s chest or abdominal area for treatment or diagnostic procedures. It can be used in place of a conventional short backboard and as a hip or leg splint. The OSS II™ includes shoulder board not found in similar devices. It can be used to prevent compression of the shoulders when using a flexible stretcher. Made in USA.

Each Oregon Spine Splint II™ (OSS II™) comes with:

- **SK-300 OSS II™ Main Body** - this durable device includes color coded straps and buckles, crossing upper chest straps and liberal use of hook and loop material for reliable connection of immobilizing accessories.

- **SK-301 Collar Strap** - designed to immobilize the lower part of the head. It is customarily used over a cervical collar (see next page).

- **SK-302 Forehead Restraint** - another Skedco innovation that employs disposable replacement non-slip pads (Dispos-A-Pads) to avoid possible slipping and loss of immobilization. Extra wide and generous amounts of hook and loop material eliminate the need for taping the head to the device.

- **SK-302A Dispos-A-Pads** - ten disposable pads are provided for the Forehead Restraint strap. The pads are replaceable after each use to prevent possible contamination by body fluids. They come 10 in a package when re-ordering.

- **SK-303 Shoulder Board** - one more Skedco innovation that prevents shoulder movement or compression when using a Sked, slatted litters or a blanket lift. It fits behind the shoulders, secured with a large Velcro pad to keep it from moving around. No other vest style immobilizer has this.

- **SK-304 Head Pads** - This set of one double and two single 3/4 inch thick head pads is used to maintain proper spacing between the board and the head. When the patient is laid down it does not compress.

- **SK-305 Carrying Case** - a durable cordura pack with zippered pocket, for the OSS II™ and all components.

- **Instructions** - the most comprehensive instructions provided with any device sold today. Composed with heavy input by leaders in the emergency medical field, these instructions are more comprehensive than found in most textbooks. Training video available at no charge.

HALF-SKED™ PATIENT DRAG

The Half-Sked™ is made of the same durable material as the Sked® stretcher, but is only half as long. The patient is secured in the Half-Sked with sewn-in two inch webbing straps with fastex style double adjustable buckles, and patients can be extricated from the tightest of confined spaces. Unlike the Sked® stretcher, the Half-Sked™ allows the patient to bend at the hips, allowing greater flexibility to turn corners. The Half-Sked™ should not be used as a hoisting or immobilization device, but for cost effective extrication from the most demanding confined spaces. There is nothing quite like it anywhere. Made in USA.

Available Color

| SK-220-OR | Half-Sked™ Patient Drag - International Orange |
| SK-220-GR | Half-Sked™ Patient Drag - O.D. Green |

AMBU PERFIT ACE™ ADJUSTABLE C-COLLARS

THIS IS THE MOST INNOVATIVE AND TRULY THE FINEST COLLAR AVAILABLE ON THE MARKET TODAY.

Features:
• Can be set to four standard adult sizes
• Sixteen settings allow for adjustment between standard sizes
• Folds completely flat
• Flip chin piece
• Safety buttons
• Horizontal sizing line

Benefits:
• One collar replaces the traditional four adult collars
• Secures a better fit to the patient while improving immobilization
• Frees up valuable storage space
• For easy assembly and airway access
• Allows for maximum reliability
• For easy and accurate sizing

Sked® Water Rescue

SKED® Flotation System

This flotation system maintains the Sked® in a nearly vertical position in the water. It is self-righting and keeps the patient’s head completely out of water, even in rough seas. The side floats and chest pad provide buoyancy sufficient to support two rescuers in the water in addition to the patient, while the lead shot filled ballast keeps the foot end down and the head elevated out of the water. The system is available in a variety of configurations, including an option with CO₂ inflatable side float logs and an empty ballast bag with hook and loop closure which can be filled with rocks just prior to use. Available in International Orange or Woodland Camo. Made in USA.

The SK-600 Basic Foam Flotation System comes with:

- SK-601 Ballast Weight - a durable bag filled with 15 pounds of lead shot which attaches to the bottom of the Sked® to make it self-right if it capsizes.
- SK-602 Inflatable Chest Pad - the chest pad attaches to the front of the packaged patient, not allowing the patient to float in a face down position. This chest pad inflates with 1 to 2 breaths of air and provides 14 pounds of buoyancy.
- SK-603 Ethafoam Floats (pair) - 6” rigid ethafoam floats which mount on each side of the Sked® Stretcher and provide the ideal amount of buoyancy.
- SK-604 Extra Long Handles - a pair of extra long handles is included to help hoist the stretcher up onto a boat or dock.
- SK-209 Retaining Strap - this strap is used to attach the foam floats and chest pad to the Sked® Stretcher backpack, allowing the entire system to be packed as a single unit.

The SK-600A Inflatable Flotation System comes with:

- SK-605/SK-606 CO₂ Inflatable Float 5” Diameter Logs (pair) - each of the float logs has an inflatable bladder covered with durable black nylon. The logs can be inflated instantly with the included CO₂ cartridges, or can be inflated by mouth.
- SK-602 Inflatable Chest Pad - the chest pad attaches to the front of the packaged patient, not allowing the patient to float in a face down position. This chest pad inflates with 1 to 2 breaths of air and provides 14 pounds of buoyancy.
- SK-604 Extra Long Handles - a pair of extra long handles is included to help hoist the stretcher up onto a boat or dock.
- SK-607 Empty Ballast Bag - a durable bag with a hook and loop secured flap which can be filled with rocks or other heavy material in the field, eliminating the need for the rescuer to carry the 15 pound regular ballast on extended excursions.

The SK-600B Hybrid Inflatable Flotation System

- Same as the SK-600A, but with the 15 pound lead ballast in place of the empty ballast bag.

The SK-600-OR Sked® Foam Flotation System, International Orange
The SK-600-GR Sked® Foam Flotation System, Woodland Camo
The SK-600A Sked® Inflatable Flotation System
The SK-600B Sked® Hybrid Inflatable Flotation System

Replacement components and National Stock (NATO) Numbers are listed on the inside back page of this catalog. NSN refers to military version of the SK-600A

NSN 6530-01-260-1227

Six Foot Long Lifting Handles

This pair of extra long handles is designed for lifting the Sked® from the water to the deck of motor lifeboats and other larger boats, or over a cliff or dock edge. They attach through grommets near the patient’s shoulders and have five sewn-in loops, making it easy to hoist the Sked® hand over hand.
SKED® RAPID DEPLOYMENT WATER RESCUE SYSTEM

This unique system features a Sked® Stretcher pre-rigged for extremely rapid deployment into the water. Using CO₂ inflatable float logs, this system can be in the water, ready to use in less than 30 seconds. A patient can be packaged and ready for retrieval in less than 30 seconds.

The Rapid Deployment System, designed especially for Marine, Navy and Coast Guard use, puts the Sked® Stretcher together with the Sked® Inflatable Flotation System in a large custom duffel bag. The system is maintained fully rigged in the bag. When deploying the system the user simply unzips the duffel bag, unrolls the Sked®, triggers the CO₂ cartridges, pulls two straps, and drops the ready to use system into the water. Skedco also offers a Rapid Deployment Conversion Kit which includes everything for rapid deployment except the stretcher, for those who already possess the Sked® Basic Rescue System.

The SK-650 Rapid Deployment Water Rescue System on the left comes with:

- **SK-200 Sked Basic Rescue System** - the complete basic system as described on page 2, including the stretcher, backpack and hoisting accessories.
- **SK-605/SK606 CO₂ Inflatable Float Logs (pair)** - each of the float logs has an inflatable bladder covered with durable black nylon. The logs can be inflated instantly with the included CO₂ cartridges, or can be inflated by mouth.
- **SK-602 Inflatable Chest Pad** - the chest pad attaches to the front of the packaged patient, not allowing the patient to float in a face down position. This chest pad inflates with 1 to 2 breaths of air and provides 14 pounds of buoyancy.
- **SK-601 Ballast Weight** - a durable bag filled with 15 pounds of lead shot which attaches to the bottom of the Sked® with hook and loop fastener. This makes the Sked® self right if it capsizes.
- **SK-604 Extra Long Handles** - a pair of extra long handles is included to help hoist the stretcher up onto a boat or dock.
- **SK-652 Sling and Carabiner Float** - a handy float with loops on it, used to prevent the slings and carabiner from sinking into the Sked®. It prevents entanglement with the patient’s legs.
- **SK-654 Rapid Deployment Carrying Case** - the specially designed duffel bag which is just the right size to hold the rigged system. Includes pockets for storing accessory items.

SK-651 Rapid Deployment Conversion Kit comes with everything shown above except the Sked® Basic Rescue System, so you can convert your own Sked®.

SKEDCO WATER RESCUE THROW BAGS

The perfect accessory for your water rescue activities, these water rescue throw bags are a necessity for boats and anywhere else where a potential water hazard exists. To use just open the drawstring at the top and pull out a few feet of rope. Hold the loop at the end of the rope and throw the bag with an underhand motion to the person in the water. If you miss, pull the bag back and allow the rope to pile up at your feet. Fill the bag with water and throw it again. When the person in the water grabs the rope, gently pull him/her into safety. The large bag contains 70 feet of 3/8” PMI Water Rescue Rope; the small bag contains 70 feet of 7mm PMI Water Rescue Rope.

**SKED® The Complete Rescue System**

**SKED-EVAC™ TRIPOD EN 795 CERTIFIED**

The Sked-Evac™ Tripod extends to ten feet high at the three anchors which are equally distant from the center (about 2 3/4 inches). Each of the anchors is anodized red for easy identification, and all are equally well centered to handle a load. The anchors, header, and legs are interconnected with 1/2" stainless steel bolts to provide maximum strength. The header limits the distance the legs can spread. When at full extension, this tripod allows you to bring the patient in a stretcher completely out of the hole. It is rated to handle an NFPA rescue load. Included with the tripod is a chain which passes through the feet to provide greater strength and stability. The chain will not degrade in acids or chemicals like nylon straps or ropes. The legs are adjustable in 5" increments, and Skedco provides safe working load data for each tripod height on each tripod. Brackets are available for mounting most popular winches. Made in USA.

**SKED-EVAC™ TRIPOD CARRYING CASE**

The Tripod carrying case features heavy duty vinyl coated nylon material with an extra long zipper along its full length and across its ends to facilitate easy repacking. It has an inside pocket in the center to store the bag of chain which comes with the tripod, preventing the chain from sliding to one end when the tripod is carried. There are handles in the center and on each end of the bag. This bag has a 9" diameter and a 7'1" length, and will make nearly any brand of tripod easier to carry. Made in USA.

**THE RESCUE HAULER 4:1 PULLEY DEVICE**

This ingenious device combines a 3-inch double pulley with a cam. The rope can move in only one direction when the cam is engaged. It allows you to raise a load by pulling on the tail end of the rope, releasing it, and getting another grip. The cam can be released manually by pulling on the attached cord. This allows you to lower the load. The cam is guaranteed for life. There are no hidden parts to this device, facilitating minimal maintenance and easy inspection in the field. The pulley sheaves and body of the Rescue Hauler and matching pulley are anodized. They will meet a 200 hour salt spray test. The Rescue Hauler accommodates rope sizes from 3/8" (10mm) to 1/2" (12/5mm). Maximum recommended load at the cam is 2300lb (1,045 kg). Minimum break strength when in use is 12,000 lb (5,455 kg). When used with a separate double pulley as shown here, it gives you a 4:1 mechanical advantage.

**SKEDCO 4:1 RESCUE KIT**

The Skedco 4:1 Rescue Kit utilizes the Rescue Hauler, a matching double pulley, 2 large steel ‘D’ carabiners, the required amount of 1/2" (12.5mm) PMI static kernmantle rescue rope, and a handy rope bag with a pocket for storing the pre-rigged system. It can be attached to an anchor and ready to use in seconds. When ordering your Skedco 4:1 Rescue Kit, remember that the rope length is determined by using 4 times the distance from the tripod anchors to the bottom of the hole, plus 30 feet for tying knots, etc.

**SKEDCO BELAY/TAG LINE KITS**

Skedco now offers 1/2" PMI Rescue Rope in a variety of lengths for use as belay and tag lines. Kits include rope and rope bag, and are available for hole depths of 25’, 50’, 75’ and 100’. Kits contain enough rope for hole depth plus 25’ for tying off. Measure hole depth from anchor point to the bottom of the hole.
SKED-EVAC™ CONFINED SPACE RESCUE SYSTEM

While most customers will want to select their own equipment to meet their specific needs, it is often useful to have a starting point which addresses the fundamental needs for confined space rescue. To that end, Skedco has combined what we believe to be essential items into a Confined Space Rescue (CSR) Kit. The customers are free to add to or delete rescue items from the kit to acquire the appropriate equipment for their situation. Skedco recommends that competent rescue professionals be consulted to address the specific requirements of any potentially hazardous environment. The Sked-Evac™ CSR Kit is available for hole depths of 25 feet, 50 feet, 75 feet, 100 feet, or can be custom ordered for any depth.

Each sked-Evac™ CSR Kit includes:

- SK-700  Sked-Evac™ Tripod
- SK-701  Sked-Evac™ Tripod Bag
- SK-200-OR  Sked Basic Rescue System
- SK-300-OR  Oregon Spine Splint II
- OP-2029  Ambu Collar Assortment Kit
- SK-720-xx  Skedco 4:1 Rescue Kit
- OP-2107D  Full Body Adjustable Rescue Harnesses (2 Ea.)
- SK-740-xx  Tag Line
- SK-740-xx  Belay Line
- SK-911-12  Skedco 12’x3” Anchor Sling
- SK-731  Continuous Loop Sling
- B17  PETZL Handled Ascender
- A06  PETZL Ecrin Best Helmet, Yellow (2 Ea.)
- SK-730  Skedco Rescue Stirrup with Screw Link
- SK-732  Rope Pad
- SK-993  24” Rope Guard
- SK-206  Large Locking ‘D’ Steel Carabiners (6 Ea.)

Kits are available for hole depths of 25’, 50’, 75’ and 100’. Skedco 4:1 Rescue System contains four times hole depth plus 30’ of 1/2” PMI Rescue Rope. Tag and belay lines contain hole depth plus 25’ of 1/2” PMI Rescue Rope. Replace xx with hole depth to designate kit preference. Hole depth should be determined by measuring from the top of the tripod to the bottom of the hole. Skedco reserves the right to substitute brand equals for items not identified by a catalog number.

---

Beware of cheap imitations.
SMC, PMI and Skedco have come together to create the most innovative tripod to ever hit the Work & Rescue market. Unlimited positions, options and one of a kind features you won't find anywhere.

The TerrAdaptor™ is the only portable high rescue anchor that is NFPA certified. It has been tested extensively in both lab and field environments. As a result, the TerrAdaptor Portable Anchor system in the standard symmetric tripod and quadpod configurations are the only systems of their kind to be certified by UL to NFPA 1983 (2006 ed.)

The TerrAdaptor™ is the most modular Tripod on the planet!

**Gin Pole/Mono-Pod:** The patented ball and spike feet provide stability. When properly rigged, it can support several thousand pounds and is ideal for close quarters where there is not enough room for multi-leg configurations.

**A-Frame/Bi-Pod:** The TerrAdaptor™ is easily configured as a standard A-Frame or a Sideways A-Frame often used in narrow areas like catwalks. The half plate can be removed to eliminate weight and opportunities for it to be in the way, or it may remain attached.

**Edge-A Tripod:** Probably the most popular configuration for an over the edge rescue, the Edge-A Tripod is essentially an A-Frame with the added stability of a third leg. Edge A configurations are popular for their large work areas, high strength and the ability to configure the A leaning either over or away from the edge. The TerrAdaptor's rear leg can be left to hinge (unsecured) or can be pinned in place for added stability.

**Tri-Pod:** Versatile design facilitates multi directional load.

**Quad-Pod:** Symmetric Quadpods fill the same role as Tri-Pod, but with added strength and stability of a fourth leg.

---

**TerrAdaptor™ Tripod System includes:**
- TerrAdaptor™ Tripod Head
- 2 Offset Leg Clamps with 3 Load Locking Pins each
- Main Attachment Pin
- 3 Legs Kits complete with Feet, Hobble Plates & Baskets
- Center Leg Clamp with 3 Load Locking Pins each
- 3 Rope Hobble Sections
- Cotter Pin Kit
- Leg Coupling Pin
- 2 Lash Ring with 1 Coupling Pin each
- TerrAdaptor™ Head/Accessory Bag
- 2 TerrAdaptor™ Leg Bag
- TerrAdaptor™ User Guide

**TerrAdaptor™ Quadpod Attachment Kit**
- Quadpod Head Attachment
- Leg kit complete with Foot, Hobble Plate & Basket
- Center Leg Clamp with 3 Load Locking Pins each
- Main Attachment Pin
- Rope Hobble Section
- MBS: 36 kN (8,093 lbf)

SKED-PAK™ MEDICAL BAG SYSTEM

SKED-PAK™ SYSTEM

Inspired by the most rigorous demands of our elite military medical groups, this medical bag system is both durable and flexible, suitable for use by military, paramedics, field medic, smoke jumpers, search and rescue units, and any person with need for a really tough bag. The system is modular, with internal components which are removable and transferable. The external bags come in two styles. The Sked-Pak™ I is a heavy duty backpack which is designed to use with the standard Military Alice pack frame and is designed specifically for use in parachute jumps. It comes complete with an integral single point release mechanism and leg straps necessary for jumping safely. The Sked-Pak™ II is a lighter duty bag which can be carried by the handle like a suitcase, but also includes concealed straps for use as a backpack. The internal components of both bags are identical, and the kit components can be removed as a unit for re-supply, or transferred quickly from bag to bag. A second removable insert can be purchased to enable instant re-supply. All components can be ordered separately, for replacement of lost parts or to keep kits pre-packed, ready for rapid replacement in a field environment. Available in International Orange, O.D. Green, Coyote Brown, or Black. All internal components are black. Made in USA.

SKED-PAK™ I

The Sked-Pak™ I Jumpable Medical Ruck includes a sewn-on single point release and removable leg straps to meet the technical requirements for use by a parachutist. This design eliminates the need for the traditional "H" harness. When released the pack drops on a lowering line for personnel safety on landing. It includes outer storage pockets, two canteen pockets, and a removable accessory pack which can be attached on the top or bottom. A second accessory pack can be purchased to increase storage capacity. Compression straps, leg straps, and release mechanism are included with each bag. The compression straps prevent loss of equipment should the zipper burst on impact. Coil zippers are used throughout the bag, allowing sliders to be pulled back over a popped zipper, making it good as new. The Sked-Pak™ I includes all internal components described below. It does not include pack frame or canteens. A Camelback can replace the 2-qt canteens. Military personnel and other jumpers are encouraged to contact Skedco for complete information regarding parachute jumping provisions of the bag.

SKED-PAK™ II

The Sked-Pak™ II is a simpler alternative to the Sked-Pak™ I, for those who do not require the jumpable bag or storage for personal gear. The Sked-Pak™ II has the same internal dimensions and components as the Sked-Pak™ I. This bag has a handle, which allows it to be carried like a suitcase, as well as stowable/concealed shoulder straps which allow it to be worn as a backpack. The Sked-Pak™ II is ideal for ground based or civilian medic, as well as air, water or ground ambulances. Since the removable main compartment is identical to the Sked-Pak™ I, a single insert could be stocked and transferred from bag to bag as dictated by field conditions.

Available Colors

SKED® The Complete Rescue System
MASS CASUALTY - DECONTAMINABLE HAZ-MAT SKED® STRETCHER (WMD)

This litter is designed for use in mass casualty incidents. These incidents could be airline crashes, terrorist incidents, Haz-Mat or any other incident where large numbers of people must be evacuated.

The HMD Sked® is extremely versatile. It can be dragged over virtually any terrain including stairways. It requires less effort from rescuers wearing level A protection. The two inch side release buckles on all straps are easy to handle with the thick gloves on level A or B suits. The straps are polypropylene for resistance to chemicals. They have sewn loops on the ends for quick attachment and removal.

Patients can be rolled onto the HMD Sked® rather than lifting or carrying. This creates less rescuer fatigue and allows many more victims to be saved.

A downed rescuer in level A can be roll loaded by using his air tank for leverage and evacuated before the standby team can zip up and enter the area. This allows his rescue without committing the standby team.

Ropes are attached to both ends of the HMD Sked® for towing out of the Hot Zone by rescuers at decon, which allows saving energy and precious air of the level A rescuer. This results in many more victims being saved. We have seen rescuers package 25 patients in 10 minutes using this method.

Note: Add “BL” after product number for Stretcher and accessories in Black

NSN 6530-01-522-7855

SHUTTLE SKED KIT

Included are 4 HMD Skeds rolled and stored in rapid deployment bags. Also included are 8 Shuttle Sked rope kits in a single rapid deployment bag to keep everything organized. It would be wise to have up to 4 more HMD Skeds to move patients from the contaminated Shuttle Skeds to decon. (see HMD video)

| SK-2510 | Shuttle Sked Kit, in yellow bag |

SHUTTLE SKED ROPE KITS

HMD Shuttle Sked ropes are constructed of 1/2 inch solid braid polypropylene. They are 200ft. long with a figure 8 knot safied with a barrel knot and taped to prevent unraveling while in use. A Large aluminum D carabiner is attached. The rope kit includes a Haz-Mat rope bag for quick tangle free deployment. These ropes are attached to both ends of a HMD Sked for dragging into and out of the Hot-zone.

| SK-2511 | Shuttle Sked rope Kits, in yellow bag |
HMD Sked™/Skyhook® System

Skyhook® Rope Winch System

This capstan style winch is rated to haul people into helicopters. It fits onto a Sked-Evac™ tripod. It can handle unlimited lengths of rope and is self tailing. It has recently been discovered for use in the WMD/Haz-Mat environment. When using continuous loops of rope it can haul as many as 6 victims at one time while delivering empty HMD Skeds back to the Hot-zone.

Skyhook Rope Winch includes:
• Skyhook winch
• Custom carrying case
• Trailer hitch mount
• Powerhead bracket
• Powerhead
• Standard crank arm
• Floating crank arm (Optional)
• Cordura cover for winch capstan

SK-2530 Skyhook® Rope Winch
SK-2531 Skyhook® Rope Winch Only (Tripod Mount)
SK-2532 Skyhook® Universal Plate Mount (Optional)

Complete Skedco/Skyhook WMD/Haz-Mat Patient Evacuation System

This system includes everything necessary for rapid evacuation of mass casualties in a chemical or bio environment. Because we never know how far away we can get from the Hot-zone we are including continuous loop twisted polypropylene ropes, 1 each, for distances of 100 ft., 150 ft. and 200 ft. Longer ropes are available by special order. This kit allows as many as 4 rescuers in level A to work in the Hot-zone on a major incident. There are 2 Skeds for each rescuer in level A. There are also 4 clean Skeds for moving patients from the warm zone to decon to prevent dragging contaminated litters outside the area. Free videos are available.

Note: It would be advisable to have a shower system between the hot and warm zone to drag patients through to initially decon the patients and litters. This will be extremely important if they need to wait any length of time before going through the decon station. Ambulatory patients can also walk through it.

This kit consists of:
• 12 HMD Sked Stretchers & 3 rapid deployment bags
• Skyhook Rope Winch System (SK-2530)
• Bagged continuous loop rope 200ft. distance
• Bagged continuous loop rope 150ft. distance
• Bagged continuous loop rope 100ft. distance
Note: Amount of rope is double the distance and the ends are spliced together at the factory. Longer rope is available upon request.
• 2 knot passing pulleys
• 2 2-inch polypropylene slings
• 14 large aluminum D carabiners
• 40ft. 1/2 inch nylon kernmantle rope
• 2 8mm PMI prusik cord
• 8 Haz-Mat rope grabs
• 40ft. 1/2 inch polypropylene solid braid rope
• 1 100 foot extension cord with reel
• 1 large screw driver

This kit is designed for a large mass casualty incident. (More HMD Skeds may be needed)

SK-2520 Complete Skedco/Skyhook WMD/Haz-Mat patient evacuation system

Beware of cheap imitations
HMD Skeds can be stored and shipped on pallets of 50 to 150 per pallet. Pallets can be stacked 4 high for prolonged storage of up to 600 HMD Skeds in a space of 8’ x 3’ x 7.5’ high. Bagged strap sets stored in moisture resistant boxes on top of the stack.

Pallets can be placed on 4’ x 8’ trailers and towed or sling loaded under helicopters or loaded onto light trucks for transport to the incident. Two people, one on each side of the pallet can attach the straps. HMD Skeds are assembled in 1-2 minutes each. This is faster than they can be used.

Ready to use HMD Skeds can be rolled 1-4 per bundle in rapid deployment bags for easy storage in compartments of Haz-Mat rescue or fire apparatus. This allows for rapid use by units first on the scene.

Emergency responses to Hazardous Materials incidents are not just dangerous, they are very complex, personnel rich, and the equipment is very expensive. These factors greatly limit the numbers of non-ambulatory patients that can be removed from a contaminated zone. The introduction of the HMD Sked and newly developed tactics, have greater capabilities in fulfilling the rescue mission. These include, at the very least, the ability to rapidly (a word not often used in Haz-Mat operations) remove large numbers of patients and minimize the risk to rescuers. By using these creative new techniques and others being developed, the potential of this device is only limited by the creativity and expertise of the trainers and field personnel. Medical Examiners have now found it safer, faster and easier to recover bodies from the contaminated area.

The rapid deployment case holds 4 HMD Skeds assembled and ready for use. It will also carry 8 bagged Shuttle Sked rope kits. That allows you to have the complete kit in 2 or 3 bags. With Haz-Mat incidents on the rise in this country and the potential for terrorist activities which can result in mass casualty incidents, the HMD Sked is a tool that allows response personnel to efficiently and above all, more SAFELY rescue substantially more of the victims.
RESCUE HARNESSES

SKED-EVAC™ YAK™ Strap in bag w/3 Alum. and 1 Lite Steel Carabiners

The YAK™ Strap is constructed of 1.75” Mil Spec Type 13 webbing with 7,000 lb. tensile strength, PS 70124-1 black steel buckles proof load tested to 5000 lbs. and double bartacked throughout using 138 red polyester thread. It can be configured as a “buddy carry strap”, "patient drag strap", or a Class III full body harness. It is an excellent victim harness. The system comes complete with a general purpose utility pouch, SK-972, MOLLE/PALS compatible, constructed of 1000 denier Army Camouflage Uniform (ACU) pattern or coyote brown CORDURA® nylon, three Aluminum Locking D Carabiners, black and one SKEDCO-SMC black, “Lite Steel” Locking D Carabiners, SK-206-B. The complete kit measures 6”x6.5”x2.5”.

The Kevlar version is extra long for use over Level "A" suit and is flame retardant and includes the SKEDCO Extreme Medicine®/Rescue Knife on a lanyard.

PMI AVATAR FULL BODY HARNESS

ANSI Fall Protection, NFPA 1983-01

Five full strength attachment options: dorsal, waist, shoulder lifts, and rear waist belt, plus side attachments for positioning. All these attachment points are UL listed as full strength attachments per NFPA 1983-01. W leg-loop suspension lifts and distributes the leg loop more ergonomically around thigh, and holds it in position better for improved comfort and better security. One-size adjustable chest harness allows use of the harness in the seat-only configuration (NFPA Class II), or as a full body harness (NFPA Class III and ANSI Z359.1). Chest harness can be attached and adjusted to size in less than a minute. These are easily shared among users. Wide-spread Y yoke minimizes the tendency of the harness to rub at the neck, and incorporates softer webbing and padded shoulder straps for comfort. Easy fit sizing fits a wide range of users with only two seat sizes. Includes storage/carrying bag. Made in U.S.A.

PMI DELTA SEAT HARNESS

All-purpose seat harness for tactical operations or for those desiring a lighter weight option. Adjustable, padded leg loops and waist belt. Two gear loops. Steel D ring attachment point. Black. Made in USA.

PMI AVATAR SEAT HARNESS

Just like your favorite pair of jeans, the Avatar is truly wearable. Ergonomic shape, contoured padding, double-adjustable waist, adjustable leg loops and adjustable rear risers lend to the comfort of this harness. Front Waist and side D Ring attachment points make this an excellent choice for work or rescue.

We carry the full line of harnesses from all manufacturer featured in this catalog.
PETZL NAVAHO® BOD

Multi-purpose work positioning and fall arrest harness designed to meet U.S. Occupational safety standards. Also meets NFPA and ANSI standards. This is one of several Navaho® harnesses available from Skedco.

PETZL NAVAHO® SIT

Multi-purpose work positioning sit harness. It can be used for prolonged suspension with the addition of the PODIUM seat. This is one of several Navaho® harnesses available from Skedco.

SKEDCO UNIFORM UTILITY BELT™

Rated at 3,000 lbs, this belt allows quick opening and closure without unlacing. It saves time when time is critical. This Uniform Utility Belt™ comes in black, coyote brown and olive drab. Available in four sizes, fits waist size of 25” to 44”. Please specify color and size when ordering.

SKEDCO INSTRUCTOR BELT™

Rated at 5,000 lbs, this belt has more stable buckle than other similar belts. It is easy to use. Available in four sizes, fits waist size of 25” to 44”. Please specify size when ordering.

CMC/ROCO Universal One Piece Harness

UL Classified to NFPA 1983 (2001) and ANSI Z359.1

All CMC/Roco harnesses fit waist sizes 30” to 44”. Larger or smaller sizes available on special order. Large center D ring accepts up to three sizes of carabiners. Heavy duty waist size D-rings for work positioning. Velcro and elastic web keepers secure loose ends. Quick connect leg loop buckles for easy, quick put on and take off. Upper rear attachment certified to ANSI standard. Improved gear loops. New padding for better ventilation. Color: Black web with Red padding. Weight 5 lbs., 2 oz.

MICRO HAULER AND PULLEY

The Micro Hauler is a tiny but extremely strong and efficient version of the Rescues Hauler. It comes in either single or double pulley versions. The cam is guaranteed for life. The pin must be removed to allow the rope to be removed or inserted. When the pin is in place it allows the cam to be opened just far enough to allow travel in both directions but it cannot come out accidentally. The break strength in the manner of use is 7,000 pounds. The Micro Hauler is only 6 inches long and features 1 inch pulley sheaves. Suggested uses: pick-offs, line transfers, inchworm systems, raising and lowering the foot end of a basket or Sked® litter from vertical to horizontal and much more. Skedco recommends using a 2 1/2 inch long screw link for attaching the rope at the bottom end of the Micro Hauler.

| SK-710-MD | Skedco Micro Hauler (Double) |
| SK-712-MD | Skedco Double Micro Pulley |
| 18502     | SMC Aluminum Locking D Carabiners, Black |
| SK-1014   | Screw Link |

**SKEDCO 4:1 MICRO HAULER RESCUE KIT**

The 4:1 Micro Hauler Rescue Kit is a miniature version of our 4:1 Rescue Kit (Page 8). This Skedco 4:1 Micro Hauler Rescue Kit utilizes the Micro Hauler, a matching double pulley, 2 standard Aluminum ‘D’ carabiners, 1 screw link, the required amount of 7.5mm PMI escape rope, and a rope bag for storing the pre-rigged system. It can be attached to an anchor and ready to use in seconds. When ordering your Skedco 4:1 Micro Hauler Rescue Kit, remember that the rope length is determined by using 4 times the distance from the tripod anchors to the bottom of the hole.

Our 3 standard kits are for 25’, 50’ and 75’ distance. The 25’ 4:1 Micro Hauler Rescue Kit is in a flat bag with belt loops. The 50’ and 75’ Kits are in round bags that measure 8” in diameter and 12” or 15” tall respectively. All 3 bags have carrying handles at the top. All Micro Hauler Kits are rigged with the pulleys at a quarter turn from each other. This will help prevent twisting of the ropes when hoisting long distance.

NSN 6515-01-522-4211

Piggy back systems allow attachment to the victim’s rope to raise him/her to safety.
ACCESSORY RESCUE PRODUCTS

SKEDCO ANCHOR SLINGS

A hoisting or safety system is only as good as its anchor. The Skedco Basic Anchor Sling is a cost effective sling made of 16,000 lb tensile strength webbing. It is 6 1/2 feet long with loops sewn on each end. It is a perfect utility strap suitable for many purposes.

When a heftier anchor sling is called for, Skedco offers our 3" wide heavy duty anchor slings, which are made of 20,000 lb tensile strength webbing and are available in lengths of 8, 12 and 20 feet. Made in USA.

SKEDCO ADJUSTABLE PICKOFF STRAP

This useful strap enables a high angle rescuer to safely pick off a victim hanging on a rope or on a ledge. It allows the rescuer to disconnect the patient from his rope without having to cut it, which prevents shock loading and the use of knives on rope. Comes in a pouch with belt loop. Made in USA.

SKEDCO PERSONAL BAILOUT KIT

This kit is designed for escape from fire environments and/or disabled construction and service equipment.

Technora® decomposes at 480°F. It is usable at 390°F for long periods of time and maintains half of its strength at 482°F.

If there is no anchor available, insert the window anchor into the lower corner of a window at approximately a 45 degree angle. Maintain tension on the rope and anchor to prevent it from slipping out of place. Climb out the window and rappel to a safer place.

DANGER: Failure to maintain tension on the rope attached to the window anchor could allow the anchor to move out of place resulting in injury or death. It is extremely important to train with this kit prior to putting it into use in a real escape situation. It is the user’s responsibility to train on and understand the use of this equipment. Available in Orange or Black. Made in USA.

- Skedco Bailout/Escape kit includes:
- Skedco Window Rappel Anchor - SK-765
- 65’ of 5/16” Technora® escape rope
- SMC 18501 aluminum carabiners (2)
- SMC mini escape 8 - NFPA126502
- Skedco escape kit pouch

SMC Large Locking D Carabiners

One of SMC’s best selling carabiners. The Large Steel Locking D was developed especially for the needs of the fire and rescue communities with a large gate opening that easily fits over litter rails. The sleeve locks on the gate rather than the body of the carabiner, eliminating problems of the knob binding on the frame after the carabiner has been loaded.

Dimensions: 5.04"x2.97"

SMC Standard Figure 8 with ears, Black

One of the most popular full-sized descenders used by professionals throughout the rescue, fire service, police/tactical and industrial/work related markets. This model is ideal for working with a single or a double wrap of rope up to 1/2" in diameter. The oval carabiner hole doubles as a belay plate for up to 1/2" rope. Machined from 1/2" thick, solid aluminum, heat-treated bar and then finished with a very tough, hard-anodized finish for extra durability.

SMC Escape 8, Black

The compact size and lightweight makes it convenient to pack in a turnout coat or bail-out kit. This descender works extremely well on single and double ropes up to 7.5 mm, and yet can be used on single ropes up to 12.5 mm. Single or double wrap allows the right amount of friction needed for a fast, yet controlled descent. Also available in Brass.

SMC Hardware, Headlamps

SMC Rope Tracker
The SMC Rope Tracker is engineered to secure, capture, protect and manage multiple ropes when negotiating difficult edge transitions. The SMC Rope Tracker channel and rib design give user the ability to manage ropes up to 16mm and flex to accommodate 90 degree edge angles keeping your ropes out of harms way. Dimensions 20.1"x3.4"x1". Weight 91 oz. Also available in Black.

| 148100 | SMC Rope Tracker, Orange |

SMC Grip Rope Grab
The SMC Grip is the best rope grab on the market. This rope grab designed to work with virtually any rope you have in your gear bag. Certified to Meet NFPA "L" - Light Use 5kN (10-12.5 rope diameter).

| NFPA220500 | SMC Grip Rope Grab |

SMC NFPA Swivel
The SMC Rescue Swivel is built around a heat-treated steel axle and a sealed high efficiency ball-bearing to ensure flawless rotation during even prolonged and difficult raises in severe rock, mountain and rescue conditions. The holes are sized to work with rescue carabiners, and allow carabiner lock sleeves to pass through without hanging up.

| NFPA136000 | SMC NFPA Swivel |

SMC Double Prusik Minding Pulley, 2.5” tread, NFPA
They may be used in many ways, from hauling and crevasse rescue to high-lines and Tyrolean traverses, hence PMPs are an important piece of equipment in wilderness and alpine exploration and all types of rescue.

| NFPA158500 | SMC Double Prusik Minding Pulley, 2.5” tread, NFPA |

DELTA Triangular Steel Screw Link
This Delta shape quick link can be used to rig anchors as well as a chest harness connector. While slower to open and close than a carabiner, they can be more secure when tightened down, and cost less. Size 10mm.

PETZL/SKEDCO TacTikka Medical™ NVG Green/White
4 LED Headlamp with NVG/NVIS Compatible Green Flip Filter

USAGE: MILITARY/POLICE ALLOWS FOR VISIBLE LIGHT TO BE USED IN A NIGHT VISION GOGGLE ENVIRONMENT WITHOUT CAUSING EXCESSIVE BLOOM

It does not create shadows like those of a filament bulb. 3 brightness settings and a blinking mode. Batteries last up to 150 hours on regular settings (up to 400 hours on blinking mode). Lamp articulates with new tilt feature. Water resistant and excellent for use anytime. Elastic band is fully adjustable and comfortable to wear.

SKEDCO Extreme Medicine®/Rescue Knife

Standard features of the Extreme Medicine®/Rescue Knife:

- Laser cut ice hardened corrosion free blade steel 440A in steel finish
- MIL spec - 40°C + 80°C operating temperatures
- Laser cut half serrated cutting edge
- Window puncher/glass breaker on handle
- Maintenance free ergonomically designed all weather handle grip
- Aluminum handle with resin inlay
- Oversized thumb stud
- Oxygen wrench hole on blade
- Internal blade release mechanism
- Pocket clip
- Each blade individually serial numbered for 100% traceability
- Design to cut patient’s clothing w/o cutting the patient

SK-WUK1 comes with pointed blade without oxygen wrench hole

SKEDCO ROPE TECH GLOVES

Whether handling a helicopter tag line or rappelling, Skedco's Rope-Tech glove gives you the protection you need without excess weight. Attention to detail is what makes this glove a perfect partner for rope handling. Two layers of goat leather across the rope path protect your hand from heat. A Clarino® Synthetic Leather palm offers maximum grip and durability, while the back of the glove features a comfortable four way stretch spandex and AirMesh. An elastic cuff and adjustable Velcro® closure provide a secure fit.

GL2230X SKEDCO Rope Tech Gloves (sizes S-XL)

PMI RAPPEL GLOVES

For other glove styles please contact Skedco.

Lightweight

Tactical

GL220XX PMI Lightweight Gloves (sizes XS-XXL)

GL222XX PMI Tactical Gloves (sizes S-XXL)

SKEDCO T-SHIRT

These totally original T-Shirts have a composite 4-part rescue scene featuring the Sked Stretcher on the front and the Skedco logo on the back. Illustrations are in black and orange on a gray background. 50% Cotton 50% Polyester. Specify Size.

C-100-X SKEDCO T-Shirt (sizes S-XXL)
DEMONSTRATION & TRAINING VIDEO
Skedco is pleased to offer a variety of demonstration and training videos for many of the products which are featured in this catalog. We recommend the use of video as a component of any comprehensive training program.

Sked Stretcher System Demonstration Video (Free) V-101
This video is a collection of a variety of stretcher uses, including patient packaging, water rescue, rapid water use, vertical hoisting, helicopter hoisting and more. A must for anyone wishing to get the full use out of their Sked rescue system. 1 hr. 37 mins. Also available in CD.

Immobilizing the Spine in a Seated Patient (Free) V-102
A comprehensive presentation of the processes and procedures relating to the proper use of the Oregon Spine Splint II. This video provides a medically correct discussion of all issues pertinent to immobilizing a patient with any vest style spinal immobilizer. You won’t find a better presentation of the topic at any price. 52 mins. Also available in CD.

Haz-Mat Sked Stretcher Demonstration Video (Free) V-107
This video demonstrates the use of the HMD Sked in the 3 basic methods. What you will see in this production is truly astounding. Never has it been possible to evacuate victims from the “hot zone” so efficiently and safely.

Kosmo Mout Lifeline™ Demonstration Video (Free) V-108
This presentation shows the “long overdue” product and method of evacuating a downed soldier or policeman from the “line of fire”. It is now, almost never necessary to risk another soldier’s life to save his buddy who is caught in the line of fire.

RESCUE PUBLICATIONS
Skedco believes that proper training, techniques and dedication to safety are critical for any type of rescue situation. To that end, we are pleased to offer publications from a variety of sources which are the most comprehensive and technically correct available today.

Trench Rescue Book
This vital resource demonstrates the tools and techniques necessary to safely and successfully carry out a trench rescue operation. Chapters include assessment, hazard control, support operations, emergency care, disentanglement, removal and transfer, as well as a glossary of key terms. OP-R1003

Confined Space Entry and Rescue, 2nd Edition
Newly revised, the CMC Confined Space Entry & Rescue Training Manual is the textbook for the confined space rescue course taught by the CMC Rescue School. It is the official textbook for the California State Fire Marshals state-certified confined space rescue courses, and the training manual of choice for fire departments and industrial rescue teams nationwide. All chapters have been updated and expanded for the second edition, and three new chapters have been added: Communications, High Point Anchor Systems, and Permitting Confined Spaces. Color has been added to most of the more than 150 illustrations for improved clarity. Quality paperback, 282 pages. OP-993214

This book has extensive use of illustrations and step-by-step procedures to help the reader develop or expand rope rescue knowledge and skills. Topics include: safety, equipment, rappelling, pick-offs, stretcher evacuations, patient packaging, improvised high anchor points, and organizing the response. More than 240 illustrations and photos take you step-by-step through lowering and raising systems, mechanical advantage, and rappel-based rescues. Quality paperback, 208 pages. OP-993201

High Angle Rescue Techniques, 3rd Edition
Knowledge of high angle rescue is vital to many emergency service personnel. High Angle Rescue Techniques' unique step-by-step approach to instruction, is a facilitates the learning process for both trainers and students. The 3rd edition of High Angle Rescue Techniques offers the latest in compliance with nationally recognized standards set by OSHA and the NFPA. Field Guide comes with the book, or may be purchased separately. 384 pages, 500 illustrations. OP-080012

Technical Rescue Field Operations Guide
This guide covers the broad spectrum of rescue incidents to which firefighters respond. Separation of the skills by Awareness, Operational and Technician levels help users perform within their training level. Checklists help organize planning, making sure all the critical elements are addressed. Pocket sized so you can keep it in your equipment cache. 160 pages. OP-993601

On Rope, 2nd Edition
By Allen Padgett, Bruce Smith and the National Spe-leological Society (NSS) Vertical Section. Excellent reference book on all aspects of vertical rope work. Strong background in vertical caving techniques with good reference information for anyone interested in single rope techniques. Lots of information on descenders, ascenders, rope, rigging, climbing systems, self rescue and more. Over 400 illustrations. OP-080005

The following list shows replacement part numbers for selected Skedco products and their corresponding National (NATO) Stock Numbers. Replacement parts for all Skedco products are available at a nominal cost. We strongly recommend that all products used for rescue be inspected regularly and parts replaced if they show excessive wear. Parts may be ordered using the Skedco catalog number or the NATO number, but the purchaser should be aware that the NATO numbers do not differentiate color. Purchasers using the NATO number should indicate color preference in their text description. If color is not specified military purchasers will receive OD green/Camo by default.
